StartNet

We're going to build the front-end part of a simple profile listing web app using https://jsonplaceholder.typicode.com/ API service as our backend.

Requirements

As a user:
- I need to get a list of all available users on the home page
- I need to see the user info details on a separate single user page
- I need to be able to create new users
- I need to be able to delete existing users

Must Use Tools and Frameworks

- React
- React-router
- CSS/SCSS
- ES6

Acceptance Criteria

- Clean and human readable code
- Eye-Friendly UI implementation
- Responsive UI

NOTE:

You are free to use bootstrap, material-ui, etc., though, it's not a must.
